SCHEDULO BUS

Bus Scheduling

Buses and drivers, planned in minutes.

Open your TransXChange timetables and Schedulo Bus builds the vehicle blocks and drivers' duties, checks every rule and saves the block numbers back to Schedulo TXC.

HOW IT WORKS

Three steps, then save

1 Timeplan
Running times and timetables for each line and day type.

2 Vehicles
Which bus drives which trips, with interworking and interlining.

3 Drivers
Duties cut at termini and depots, under your working-time rules.

Save
Back into the project for Schedulo TXC's bring-back.

Reads your timetables
Schedulo projects or TransXChange files: lines, stops, journeys, days of operation and bank holidays.

Every rule checked
Breaks, duty length, relief points and signing. Issues and Analyze say what's wrong in plain words.

Work together live
Share by a join code, in the office or from anywhere, with View, Edit or Full access.

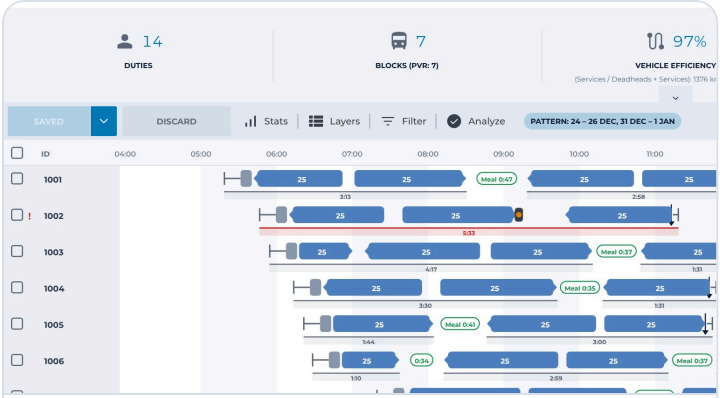

OPTIMIZE
Proposes the fewest buses and lowest cost. Accept it or keep yours; locked work stays.

Print and export
Running boards, timetables and reports in your brand, printed or saved as PDF files.

Made for planners
Drag and drop, batch rename, copy to other days, filters, key figures, light and dark.

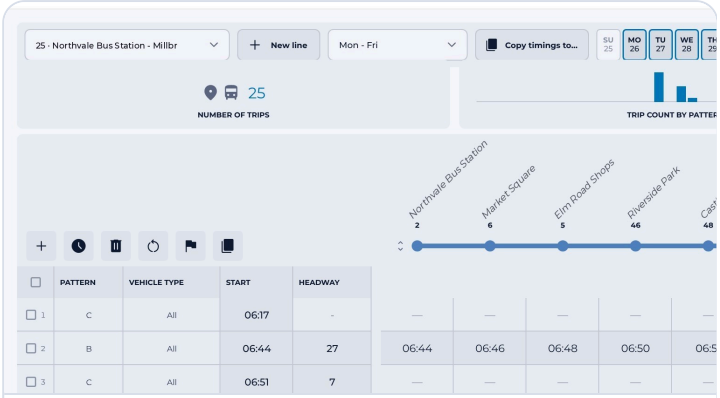

SCHEDULO BUS

Everything a scheduler needs for the day's buses and duties, in one window.

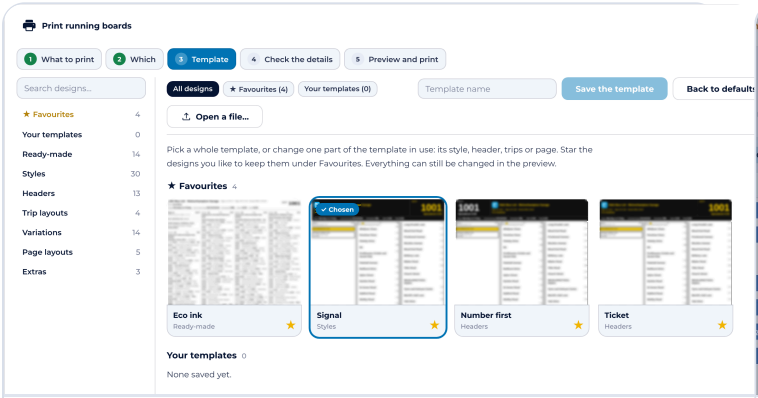

Drivers' duties at a glance

Every duty on a timeline with meal breaks, reliefs and travel. Click a duty for its paid time, signing, breaks and issues.

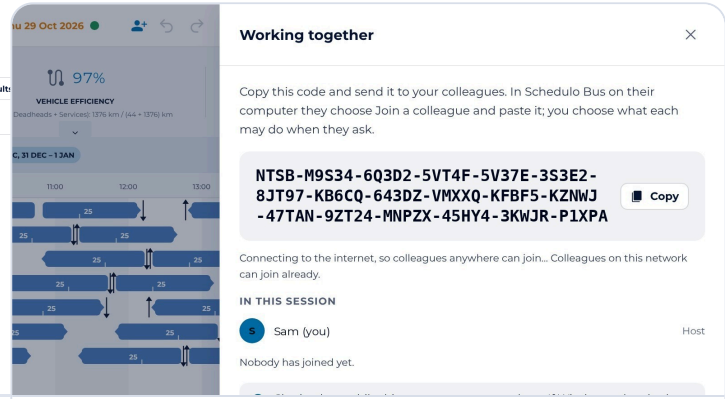

Timetables and running times

Time bands with their own running times, and every trip at every stop. Copy timings to other days.

Print in your own style

Running boards, duty cards and timetables from a gallery of designs in your brand kit, printed or saved as PDF files.

Plan together

Start sharing, give a colleague the code and let them in. Everyone's changes appear within a second or two.

Get started in two minutes

1. Run **schedulo-bus.exe** and enter your Schedulo Bus licence key.
2. Choose **Open a Schedulo project** or **Import TransXChange files**.
3. Follow the guided tour, adjust blocks and duties, and press **SAVE**.
4. **Save to the project**, then run **Bring back workings and duties** in Schedulo TXC.

What you need

- Windows 10 or 11
- A Schedulo Bus licence key from Schedulo Licence Manager
- A Schedulo TXC project or TransXChange files
- Internet only for maps, road snapping and sharing beyond the office
